**Quantity:** Sold as a kit

**Notes:**

This is an 11 in. HD replacement, no dowel pins are required. Clutch will not work with a stepped flywheel. If you have a stepped flywheel a flat flywheel will need to be used.

**OK**

**RAM HDX Clutch Kits**

RAM HDX clutch kits are ideal for street/strip applications. They produce 30-60 percent more clamping pressure

over stock and can handle power up to 450 hp. HDX clutches feature ductile iron, explosion-resistant pressure rings that meet SFI certifications for use in competition. The HDX disc provides the smooth engagement necessary for maximum performance and drivability on the street with no chatter on takeoff. Most clutch discs utilize an 8-sprung hub with an upgraded organic friction material. The flywheel must be resurfaced or replaced prior to installation to validate the warranty. Order the kit recommended for your application.
